mouse

The MOUSE is a special purpose stroller designed for children who are unable to walk or sit in the correct position as a result of injury or another condition.

With adjustable pads, the backrest can be optimized to the child's needs and will provide the right security. Large wheels (gel-filled or pumped), with shock absorbers of rear as well as front wheels, facilitate comfortable travel on uneven ground.

The stroller offers a high seat comfort thanks to tilt in space and recline (so-called "cradle"), which will help you to put the child in the right position, making sure that the pressure is distributed evenly.

why MOUSE?

1 Reducer cushion

This insert allows to adjust internal dimension of the seat (depth and width) to maximise comfort and safety of the child.

2 Reversible seat

The construction of the stroller allows to easily rotate the seat opposite to the driving direction.

3 Adjust the backrest to lying position

Thanks to a variety of possible adjustments you can transform a regular stroller into a safe and cosy place for a nap.

4 Foldable frame and removable seat

The construction of main elements of the stroller allows to disassemble it into 2 separate units (frame and seat) – you may easily pack the stroller even into the smallest car trunk.

Mewa

trusted support
everyday

The MEWA - special purpose stroller is designed for children who are unable to walk or sit in the correct position as a result of injury or another condition.

With adjustable pads, the backrest can be optimized to the child's needs and will provide the right security. Large wheels (gel-filled or pumped), with shock absorbers of rear as well as front wheels, facilitate comfortable travel on uneven ground.

the stroller offers a high seat comfort thanks to tilt in space and recline - so-called CRADLE, which will help you to put the child in the right position, making sure that the pressure is distributed evenly.

Mewa is also fitted with a table that can be used for feeding, exercising or playing. Abduction belts stabilize the pelvis and secure the child from sliding out of the buggy.

1 SEAT MINIMIZING KIT NEW SOLUTION + wide range of additional accessories

A set of 4 separate, specially designed pads allows to perfectly adjust the stroller to the user needs. Additionally a variety of additional accessories considerably enhances user comfort – create and enjoy your own set!

2 CRADLE function - INCREDIBLY ERGONOMIC

The stroller offers a practical function of tilting the seat together with backrest giving your child safe and the most ergonomic position during any travel.

3 Foldable frame and removable seat

The construction of main elements of the stroller allows to disassemble it into 2 separate units (frame and seat) – give yourself considerably more space!

4 Reversible seat

The construction of the stroller allows to easily rotate the seat opposite to the driving direction.

Grizzly

trusted support
everyday

GRIZZLY is designed for children with various motor dysfunctions and disease entities in result of which movement is significantly hindered or even impossible. This stroller is suitable for children at a height of 85 - 140 cm and a weight of 43 kg.

It is equipped with a comprehensive stabilization system at the level of the head, chest and hips - a system of pads adjustable both in height, width, depth, and at an angle. The width and depth of the seat and the height of the backrest are also adjustable, thanks to which the wheelchair grows with the child - RZTsystem (I grow when you do).

Grizzly allows you to easily rotate the seat opposite to the direction of travel. It offers you the so-called CRADLE (tilt in space and recline) - possibility of quick and simple adjustment of the angle of both the seat and the backrest. Moreover, Grizzly is equipped with pedal for lifting allowing to effortlessly lean back the stroller and easily drive up any curbs or stairs.

why GRIZZLY?

1 GROWS with the child

The telescope adjustment of backrest (height) and seat (depth, width) including adjustable pads allow Grizzly to be tailored to fit your child's needs in 100%.

2 CRADLE function - INCREDIBLY ERGONOMIC

The stroller offers a practical function of tilting the seat together with backrest giving your child safe and the most ergonomic position during any travel.

3 positively CRASH TESTED

Positive crash test results allow Grizzly (the whole stroller) to be used as a seat in vehicles specially adapted for transporting persons with disabilities.

4 elegant look and practical solutions

New, stylish design of the stroller, high quality and subdued colours of upholstery (linen type material) give Grizzly an elegant look.

NEW

YETI

trusted support
everyday

We proudly present you our new special needs stroller – YETI; a meticulously designed response to the needs of the older children at weight up to 75 kg. Its solid construction and a wide range of parameters adjustment allow to meet user's moderate needs at the highest possible level.

The variety of practical accessories and fast folding mechanism significantly simplify the everyday use irrespective of the weather conditions and time of the year.

Yeti's strong suspensions with full gel wheels, central brake, lifting bar and a directional lock guarantee perfect performance at any type of surface. Modern and practical design is his additional asset.

why YETI?

1 THE MINIMIZING KIT -
YETI grows with YOU

A set of soft narrowing inserts allows you to adjust the width of the stroller for smaller children. The possibility of attaching them to the upholstery at any height allows you to put the child in the optimal position.

2 FLEXIBLE upholstery
easy to use

Multiple stage tension system of a backrest allows for the most individual and complex adjustment. Core of the system is based on extremely durable velcro straps. It's intuitive disassembly and small dimensions after removal help you keep it clean.

3 practical and solid
RUNNING GEAR

YETI has a set of full durable wheels adjusted to user's maximum weight. It is also equipped with an easy-to-use central brake and direction lock on the front wheels. In addition, the tilt foot helps overcome small obstacles.

4 a WIDE RANGE
of accessories

Like all other MyWam strollers, YETI has wide range of equipment. Depending on your needs, you can prepare your stroller for a specific time of the year and the weather, which significantly affects the comfort of use.

Pegaz

trusted support
everyday

PEGAZ is a lightweight, umbrella type stroller. It was developed for mobile parents and children who often travel using various means of transport.

Simple to fold and unfold, lightweight, conveniently small when folded - PEGAZ will be a perfect everyday stroller for you. Now it will be much more pleasant to get your child to a doctor for a rehabilitation session, to kindergarden, to go shopping or to go on holiday together. Pegaz, in standard version, includes all accessories you need to take for your young traveller; improving appearance of the stroller at the same time.

To enhance child user comfort, separate shock absorbers are installed on each of the four gel wheels, while comfortable padding, interesting colors, functional table or safe 5-point harness is just the beginning!

why PEGAZ?

1 GROWS with the child

One may easily and quickly increase the depth of the seat by 4 cm and length of the backrest by 10 cm. This and the additional narrowing pads will allow you to enjoy this stroller even longer!

2 ANGULAR adjustment of the backrest

The angular adjustment of the backrest allows to fix the most efficient body position and increase driving comfort.

3 COMPACT and SIMPLE to use

Simple folding and unfolding system, light weight and small dimensions once folded make this stroller your best everyday support.

4 LIGHT and DURABLE frame

Its construction is made of aluminium and steel alloys making the stroller highly durable (maximum possible load up to 40 kg) and extremely light (9 kg) at the same time.
