Grizzly

Children like teddy bears,
and teddy bears like children!

CERTIFICATE OF CONFORMITY CBC/Cert/043/2016

PRODUCT DEVELOPED IN POLAND WITH MATERIALS FROM DOMESTIC SOURCES

CRASH TESTED ISO 7176-19

The special Grizzly rehab buggy is designed for children for whom it is difficult to move or even impossible due to their motor dysfunction or disease entity. The rehab buggy is designed for children at a height of 85 - 140 cm and a weight of 45 kg.

It is equipped with a comprehensive stabilization system at the level of the head, chest and hips - a system of pads adjustable both in height, width, depth, and at an angle. The width and depth of the seat and the height of the backrest are also adjustable, thanks to which the wheelchair grows with the child - **RZT system** (I grow when you do).

The rehab buggy has the ability to change the position of the seat in relation to the direction of travel - forward or backward to the driver. As a standard, it is equipped with the so-called CRADLE - the possibility of changing the angle of the seat and the backrest. Maneuvering and movement on curbs are facilitated by the foot-release tilt actuator.

Rehab buggy's upholstery made of high-class imitation of flax, occurs in 3 colors:

Blue Burgundy Gray

TALL WINTER SLEEPING BAG
Comfort of use in the winter

FURRY ELEMENTS
Children love teddy bears :)

SAFETY FRAME
Comfort and safety

- Shock absorption of frame
- Directional lock of front wheels
- Central brake and shoe heel (pedal for lifting)
- 5 point safety belt
- ... and really full range of additional equipment!

What makes Grizzly SO exceptional?

The rehab buggy is distinguished by elegance and modernity. It was created in such a way as to reduce the parents' sense of moving a special rehab buggy to the greatest extent possible. At the same time, it contains a number of facilities and enables to configure it in such a way that it meets the requirements and needs of the child.
Its characteristic white frame and extraordinary upholstery which is a flax imitation make it both elegant and functional. Thanks to the use of complete wheels with an EVA infill and a suspension system on the rear wheels, the rehab buggy moves smoothly even on difficult terrain.

What's new?
The RZT system (I grow when you do)

The telescopic regulation of support (height) **and seat** (depth and width) **parameters along with regulated pads provides wheelchair level that is optimal to the child's height.**
