

color inserts
for PEGAZ special stroller

Pegaz 

The insert for the PEGAZ special stroller was created to support young wheelchair users and their carers.

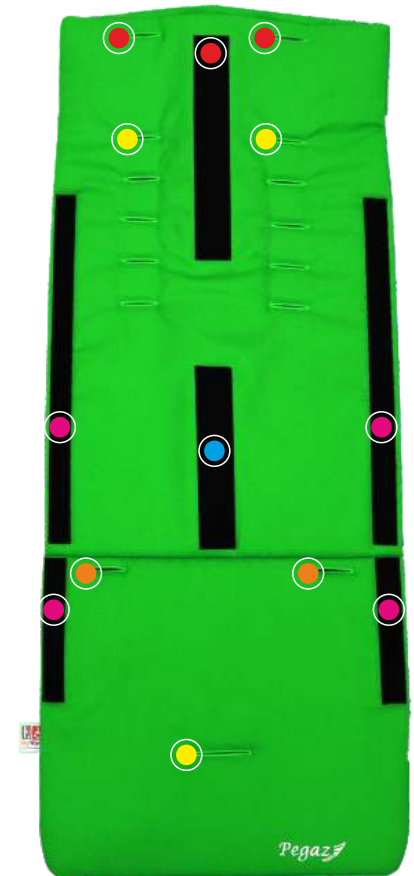

Thanks to the flexible filling, it gives the seat additional softness, which increases comfort during traveling.

Installation method is intuitive, and the strong Velcro system allows for precise attachment, thanks to which it keeps the right position throughout its use.

Thanks to the proper repetition of all the upholstery elements of the Pegaz stroller, such as holes and mounting velcro, it is possible to correctly route all the belts in the desired configuration, as well as install narrowing inserts and the headrest.

The inserts are fully washable and their easy assembly and disassembly allows you to keep the stroller clean without frequent assembly and disassembly the entire upholstery.

-  holes / VELCRO for the headrest
-  holes for 5-points safety belts
-  VELCRO for narrowing inserts
-  VELCRO for lumbar pad
-  hole for abduction belts

The insert for the PEGAZ special stroller was created in four color versions, thanks to which the stroller as we know it takes on a new, unique character.

● GRAPHITE

● PINK

● GREEN

● BLUE
