

# ADVANCED POSITIONING WITH STABILO CUSHIONS.

FOR USERS: 100 - 150 CM, UP TO 55 KG

NEW

# alfa flex

## The Alfa flex special needs stroller

It features a solid, durable construction with a seat and backrest equipped with removable STABILO orthopedic cushions, allowing precise positioning of the child's body and proper stabilization during everyday use.

Additionally, with the use of pads supporting the cushions, abduction-stabilizing belts, and a five-point belt, Alfa Flex provides safe and comfortable support during walks. The stroller is also equipped with the "I grow with You" system, which—thanks to a wide range of backrest, seat, and footrest adjustments—allows perfect adaptation to the child's height and needs.

USE IT ACCORDING TO THE INSTRUCTIONS FOR USE OR LABEL.**

# PRODUCT SPECIFICATIONS

## Construction

The construction of the Alfa Flex stroller consists of two basic elements: a frame with a seat and a backrest. The backrest is fixed to the seat with the help of a simple locking mechanism, which significantly facilitates transport and everyday use.

## Stabilo cushions

The set includes three STABILO orthopedic cushions: a headrest cushion, a backrest cushion, and a seat cushion with an abduction wedge and lateral pads. Their special construction supports proper spinal alignment and reduces pressure on sensitive areas of the body, helping prevent pressure sores and discomfort. The cushions can be easily shaped and adapted to the user's anatomy using the included pump.

# FUNCTIONS

## “I grow with you” system

The Alfa flex stroller offers a wide range of adjustments — the seat depth and backrest height can be easily adapted to the child's growth. Combined with adjustable pads and an adjustable footrest, the stroller grows with the user, ensuring comfort and functionality for many years.

## Rear wheels with shock-absorbing suspension

The rear wheels are equipped with a suspension system that effectively reduces vibrations when driving over uneven surfaces. This ensures greater comfort for the child and smoother stroller handling.

## Swivel castor lock

The front wheels feature a directional lock, allowing for stable stroller guidance on straight paths and in more demanding terrain.
